

POLYCARBONATE BIRD SPIKES

VEXO polycarbonate base spikes are an effective, economical and maintenance free method to evict birds from an area. PC base spikes are constructed from a durable UV stabilised polycarbonate to withstand harsh conditions.

Stainless steel spikes also resist UV degradation and chemical corrosion.

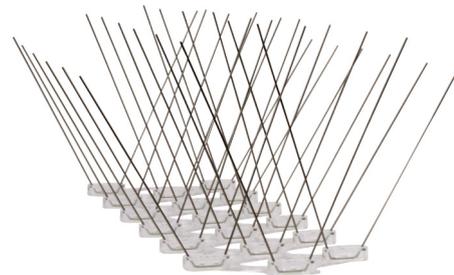

In addition to being scored to enable segments to be quickly snapped off during installation, VEXO PC Spike bases are also designed to be interlaced to facilitate efficient installation where multiple spike strips are required to span wide structures.
