

SWALLOW BIRD SPIKES

VEXO Swallow spikes – an innovative solution designed to deter swallows nesting under the eaves.

Uniquely angled for versatile installation, these spikes can be effortlessly placed upside down in eave corners, precisely where swallows tend to build their mud nests.

Crafted with strategic design, these spikes effectively deter swallows without harming them. Made from durable stainless steel, VEXO Swallow Spikes offer a humane and long-lasting approach to preventing nest formation, ensuring a swallow-free environment while preserving the architectural integrity of your eaves.

Choose VEXO Swallow Spikes for a discreet and effective deterrent against unwanted nesting, providing peace of mind for your property.

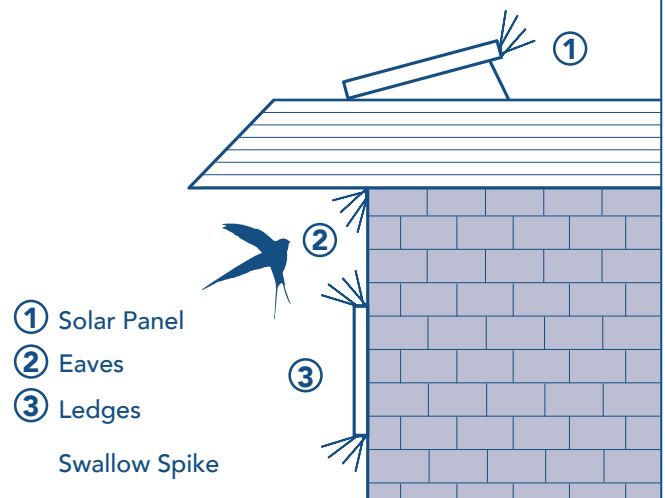

SW71

VERSATILE APPLICATION

These spikes were originally designed to deter swallows from building their nests under house eaves.

They have now also gone on to become an innovative solution for narrow ledges and angled/recessed solar panel installations.

In addition to this versatility, you can also count on the superior quality and durability provided by VEXO Swallow Spikes.

SUPPORT

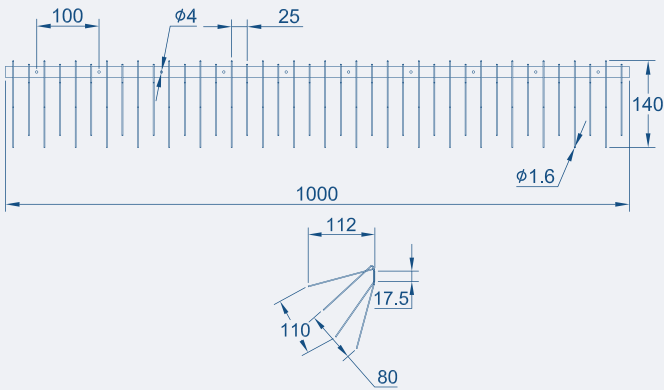

VEXO spikes can be custom manufactured to suit unique projects.
